#### § 216.121

Guadalupe fur seals (Arctocephalus townsendi), and Steller sea lions (Eumetopias jubatus).

#### §216.121 Effective dates.

Regulations in this subpart are effective from March 1, 1999, through December 31, 2003.

## §216.122 Permissible methods of taking.

(a) Under Letters of Authorization issued pursuant to §216.106, the 30th Space Wing, U.S. Air Force, its contractors, and clients, may incidentally, but not intentionally, take marine mammals by harassment, within the area described in §216.120, provided all terms, conditions, and requirements of these regulations and such Letter(s) of Authorization are complied with.

#### (b) [Reserved]

#### §216.123 Prohibitions.

Notwithstanding takings authorized by §216.120 and by a Letter of Authorization issued under §216.106, no person in connection with the activities described in §216.120 shall:

- (a) Take any marine mammal not specified in §216.120(b);
- (b) Take any marine mammal specified in §216.120(b) other than by incidental, unintentional harassment;
- (c) Take a marine mammal specified in §216.120(b) if such take results in more than a negligible impact on the species or stocks of such marine mammal; or
- (d) Violate, or fail to comply with, the terms, conditions, and requirements of these regulations or a Letter of Authorization issued under §216.106.

### §216.124 Mitigation.

- (a) The activity identified in §216.120(a) must be conducted in a manner that minimizes, to the greatest extent possible, adverse impacts on marine mammals and their habitats. When conducting operations identified in §216.120, the following mitigation measures must be utilized:
- (1) All aircraft and helicopter flight paths must maintain a minimum distance of 1,000 ft (305 m) from recognized seal haulouts and rookeries (e.g., Point Sal, Purisima Point, Rocky Point), except in emergencies or for real-time se-

curity incidents (e.g., search-and-rescue, fire-fighting) which may require approaching pinniped rookeries closer than 1,000 ft (305 m).

- (2) For missile and rocket launches, unless constrained by other factors including, but not limited to, human safety, national security or launch trajectories, in order to ensure minimum negligible impacts of launches on harbor seals and other pinnipeds, holders of Letters of Authorization must avoid, whenever possible, launches during the harbor seal pupping season of February through May.
- (3) For Titan IV launches only, the holder of that Letter of Authorization must avoid launches, whenever possible, which predict a sonic boom on the Northern Channel Islands during harbor seal, elephant seal, and California sea lion pupping seasons.
- (4) If post-launch surveys determine that an injurious or lethal take of a marine mammal has occurred, the launch procedure and the monitoring methods must be reviewed, in cooperation with NMFS, and appropriate changes must be made through modification to a Letter of Authorization, prior to conducting the next launch under that Letter of Authorization.
- (5) Additional mitigation measures as contained in a Letter of Authorization.
  - (b) [Reserved]

# §216.125 Requirements for monitoring and reporting.

- (a) Holders of Letters of Authorization issued pursuant to §216.106 for activities described in §216.120(a) are required to cooperate with the National Marine Fisheries Service, and any other Federal, state or local agency monitoring the impacts of the activity on marine mammals. Unless specified otherwise in the Letter of Authorization, the Holder of the Letter of Authorization must notify the Administrator, Southwest Region, National Marine Fisheries Service, by letter or telephone, at least 2 weeks prior to activities possibly involving the taking of marine mammals.
- (b) Holders of Letters of Authorization must designate qualified on-site individuals, as specified in the Letter of Authorization, to:
